## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/1/03 has been entered as requested on 3/1/04.

Applicant's arguments filed 12/1/03 have been fully considered but they are not persuasive. Claims 1-39 are under consideration by the examiner.

### ***Information Disclosure Statement***

Applicant is again reminded of their duty to disclose all information that is known to them to be material to patentability of the instant claims.

### ***Claim Rejections - 35 USC § 112***

Claims 1-39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This is an enablement rejection.

This rejection is maintained for reasons of record. It is maintained that the claims do not reflect the particular steps and multiple linear regression models used in the examples to achieve the goal of selecting oligonucleotide probes and no guidance is provided on other computer implemented methods for selecting oligonucleotide probes. The examples in the specification

fail to provide sufficient information or guidance to permit one of ordinary skill in the art to reproduce them.

As set forth in the Advisory Action mailed 12/24/03, applicant has provided no explanation supporting their assertion that the method as claimed is enabled by the specification. Applicant has not addressed how one could have practiced the method commensurate in scope with the claim in view of the examiner's comments including that much of the referenced information is improperly incorporated by reference and examples of the specification could not be reproduced based on the limited information supplied by the specification. The claimed method remains an invitation to experiment and would require undue experimentation to practice as it would have required one to use inventive skill and decision making which do not fall within routine experimentation.

### ***Conclusion***

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1631

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
